Configuration Management Plan

Introduction

Describe the plan's purpose, scope of application, key terms, and references.

Management

(Who?) – Identify the responsibilities and authorities for managing and accomplishing the planned SCM activities.

Activities

(What?) – Identify all activities to be performed in applying to the project.

Schedule

(When?) – Establishe required coordination of SCM activities with other activities in the project.

Resources

(How?) – Identify tools and physical and human resources required for the execution of the plan.

Plan Maintenance

Identify how the Plan will be kept current while in effect
